Telugu

## RECOGNITIONS

- Super10 QA - Innominds April 2019
- Pat On Back - CDK November 2016
- Hackathon Winner - CDK Oct 2015
- Star Award - Infosys May 2015

## SUMMARY AND SKILLS

- Experienced Automation Test Engineer with a proven track record of **10+ years** in developing and enhancing **automation frameworks and scripts**.
- Specialized in testing cloud-based enterprise **Web, Desktop, and API** applications using a wide range of tools and programming languages.
- Proficient in **Playwright, Selenium**, CodeceptJS, TestStack White, CodedUI, JMeter, and Rest Assured.
- Skilled in utilizing programming languages such as **Typescript, Python, Java, and C#** Dotnet to implement effective test automation solutions.
- Strong expertise in ensuring high-quality software delivery through comprehensive automation testing.

## KEY ROLES PLAYED

- Built Hybrid UI, API, and Database integrated Automation Test Frameworks
- Developed hybrid automation test frameworks integrating UI, API, and database testing components.
- Implemented custom execution strategies to significantly reduce and optimize test execution time by ~50%
- Built an API-based load test suite using JMeter to simulate up to 5X load conditions.
- Ensured test data and configurations were securely stored and accessed using AWS S3 and Secrets Manager.
- Enhanced test result reporting by integrating Allure, Extent, and custom in-house reports.
- Integrated test automation into CI/CD pipelines using customized Jenkins Jobs.
- Collaborated with CTOs to successfully implement test automation initiatives from scratch.
- Integrated with third-party tools such as TestRail, JIRA, BrowserStack, LambdaTest, and HPALM for seamless test management and execution.
- Implemented dynamic test data creation and cleanup strategies for efficient and effective test automation.
- Conducted proof of concepts (POCs) to assess automation compatibility with the product.
